About AGYA

The Arab-German Young Academy of Sciences and Humanities (AGYA) is based at the Berlin-Brandenburg Academy of Sciences and Humanities (BBAW) and at the Academy of Scientific Research and Technology (ASRT) in Egypt. It was established in 2013 as the first bilateral young academy worldwide. AGYA promotes research cooperation among outstanding early-career scholars (3-10 year after PhD) from all disciplines who are affiliated with a research institution in Germany or any of the 22 Arab countries.

The academy supports innovative projects of its members in various fields of research as well as in science policy and education. More than 60 members – Arab and German scholars in equal numbers – realise joint research projects and collaborative initiatives on topics such as Arab and German Education; Common Heritage and Common Challenges; Energy, Water and Environment; Health and Society; Dynamics of Transformation; and Innovation. AGYA is a dynamic think tank which provides fresh and pioneering Arab-German perspectives and strengthens new forms of resilient North-South-South cooperation.
