About AGYA:

The Arab-German Young Academy of Sciences and Humanities (AGYA) has been established in 2013 at the Berlin-Brandenburg Academy of Sciences and Humanities as the first bilateral young academy worldwide. AGYA promotes research cooperation among outstanding early-career researchers (3 – 10 years post-PhD) from all disciplines who are affiliated with a research institution in Germany or any Arab country. The academy provides partnership-building opportunities and funding to support the innovative projects of its members in various fields of research as well as in science policy and education.

GENERAL INTRODUCTION

In collaboration with the Lebanese American University and the University of Heidelberg, the Arab-German Young Academy of Sciences and Humanities and its working Group 'Transformation' are organizing an international and interdisciplinary workshop that will problematize from both historical and contemporary perspectives the theme of 'refugee transfers in the Euro-Arab Mediterranean zone'. The workshop will take place from 10 until 12 of April 2017 at the Lebanese American University (Byblos Campus).

In the wake of the Arab uprisings and ensuing upheavals, displacement and refugee crises have been mainly tackled through the prism of securitized policies, practices and speech acts. Migration scholars and social scientists have reflected on the shortcomings and pitfalls of international cooperation in burden sharing and have deplored the 'securitization' of the so-called refugee crises in Europe, the Middle East and beyond.

The workshop seeks to contribute to the literature on the transnational diffusion of norms through the prism of migration, asylum and flight. It draws on a joint trans-regional and trans-historical approach with a view to investigating the nature and contents of sociocultural, political and religious transfers that refugees have channeled within the Euro-Arab Mediterranean zone.

While taking into account challenges that refugee flows pose for policy making and local communities, the workshop will discuss theory guided contributions and case study analyses. Overarching themes include but are not restricted to:

- Historicizing refugee knowledge transfers from the Middle Ages until the 21st century;
- Shining a light on various economic, cultural and political contributions that refugees have circulated;
- Inquiring into methodological tools of transregionality, transnationality, and transculturality that allow us to capture both quantitatively and qualitatively refugee norm diffusion in historical perspective;
- Generating insights and cross-comparative lessons that could inform policy-making approaches and international organizations' programmatic strategies in the Euro-Mediterranean zone
